

AT RF20 ECCM Handheld Multiband Transceiver Package

AT RF20 ECCM Handheld Multiband Transceiver Package

A package -contained set of functionally intertwined handheld and mobile transceivers AT RF20 and AT RF2050, providing reliable (TRANSEC) and safe (COMSEC) communication under very demanding conditions. The transceivers operate in several frequency bands (multiband), serve several purposes (multirole) and work in several operation modes (multimode).

RF20 handheld ECCM transceiver is designed for communication on the tactical level in all military branches. Used mainly where there is need for high quality communication with lightweight equipment. AT

RF2050 mobile EPM transceiver is designed for installation in all track and wheel vehicles.

The transceivers follow up the AT RF13 line transceiver, guaranteeing operational and logistical compatibility
